

AT SIHA SECONDARY SCHOOL.

It was on 10th July 2004 I started my advanced level secondary school education at Siha high school. It is about 120KM from Moshi town. I was registered for taking science subject Chemistry, Biology and Geography. It was so nice time to study. I meet different friends and share ideas, skills and so many other things. The subject were very tough since we were having few teachers and lack of curricular materials. We study very hard to meet our goals. On February 06 I sited for my national examinations and 22nd 2006 I left the school.

During my studies I evolved in different activities, I participate in environmental conservation also participate in social groups where we have several discussion on the cross cutting issues especial HIV/AIDS, Many Youth change attitudes, We also discuss on the bad norms and tradition which hinder the development and how to achieve life. Also we discuss about education after finishing our studies in relation to the real life situation that many parents have no ability to pay for school fees. I also involved in religious activities where I was leading a school choir.

During our studies we had a field trip to Ngorongoro National park and Manyara, We studied a lot of thing as geography and biology is concern we saw different animals and land forms it was so interesting

At Ngorongoro National park during my second year of the course. The place is called Ngoitocktock spring.

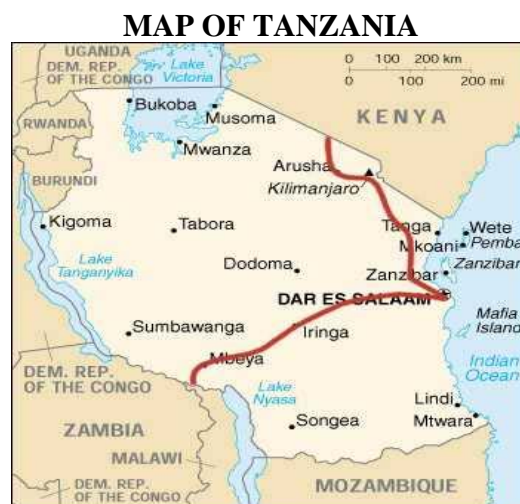

The school was having shortage of water especial clean water for drink, we used the pumped water from river which was treated, we use it for cooking washing and other activities, We thanks god that no problem has happened.

I also involved in computer department as computer expert, here I helped the school in maintains the computers and helping my fellow student at least to know ABC about computer also help or school secretary in different programmers.

In fact I enjoy my studies at Siha High School I was awarded a Certificate.

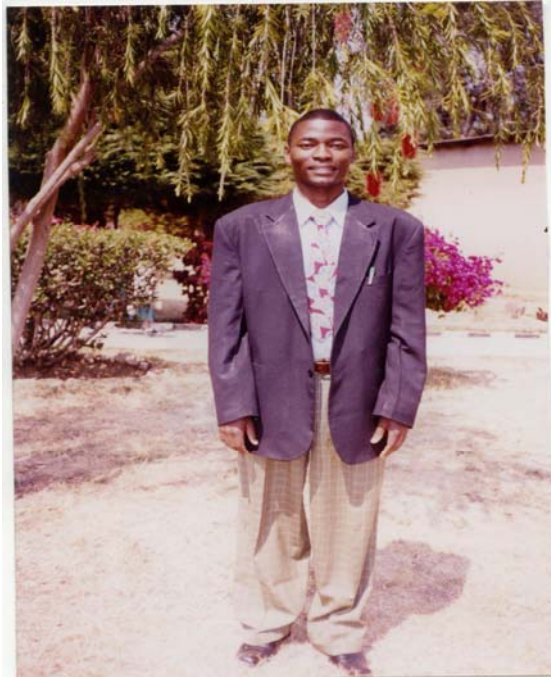

AFTREER STUDIES

I THANKS God that I finished my two years safely, I was at home waiting for my results, I search for a job without success. The results was out I get 13 point division III with three principals. I t was another had time to think on my studies although I was having all the qualification to join any university, The issue was not to get a collage the issue was to get loan from the HSLB(higher Studies Loan Board).At that year the government (loan)was sponsoring the boys having only division one and girls of division one and two only, This was due to high performance especial for arts subjects. So I struggle to get a collage, I succeed to get a collage, I get Community Development college at Arusha region, also Tumaini university Collage(Makumira)to study education also apply for Diploma in education to the ministry of education, I thanks God that I was selected by the ministry of education and vocation training to study diploma in education at Klerruu teachers collage. Klerruu Teachers Collage is located at Iringa region which is southern of Tanzania

There was some percent of school fees to be paid by parents which was about 150\$ or 150,000Tsh.per year. My parents fail to get the amount since at the moment they pay for my sister about 350\$ or350,000Tsh,My sister was at her last year of her Secondary education. For that time I struggled and get 85\$ which later I use for my preparation. I inform My friend and my Teacher Linus. And kindly agree to help me on school fees, I was very happy and I travel to Iringa and start my new life at Klerruu teachers collage [Click here for receipt](#)

Since my joining instruction was late I reported on 23rd September 2006 and get register on 25th . it was about three weeks since we start the course. It was very hard time since I was having many things to reed and we were having a monthly test. I did the test and it was so wonderful that I perform very well.

It was so good and interesting to be at collage and study. The weather is conducive for sduying.although some time is very cold.

Klerruu teachers collage is a science collage offer diploma in science and technical education for both sex,

There are many steam according to subjects as follows

- ✓ Chemistry and Biology CB
- ✓ Chemistry and Geography CG
- ✓ Physics and Chemistry PC
- ✓ Physics and Geography PG
- ✓ Physics and Biology PB
- ✓ Geography and Biology GB
- ✓ Geography and Mathematics GM
- ✓ Physics and Mathematics PM
- ✓ Chemistry and Mathematics CM

I am studying Geography and Biology with other education subjects such as

- ✓ Foundation of education FE
- ✓ Education Research ER
- ✓ Education Psychology EP
- ✓ Curriculum and teaching C&T
- ✓ General studies GS
- ✓ Information Communication technology ICT

DOMITORIES

Klerruu Teachers college have three halls, Hall one and Hall two is for male.and Hall three is for girls. In this halls there are many rooms and each room consists of two members

The rooms have all facilities conducive for living and studying. I thank God that I get a good room met who we share knowledge skills and interest

FOODS

The collage offers breakfast, lunch and dinner. The breakfast is only tea and if it is bread or any other thing we depend

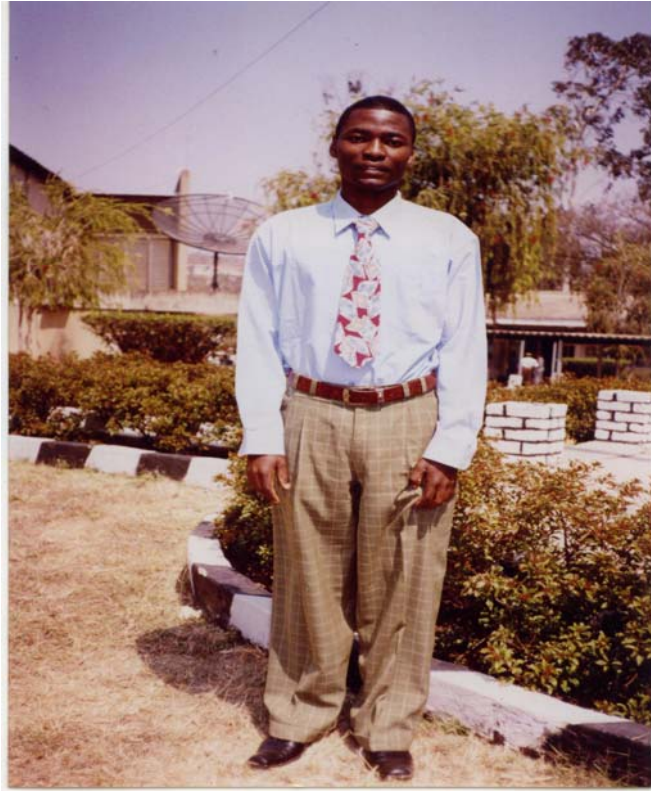

on ourselves. The lunch and dinner is stiff porridge (Ugali) and beans except we have meat in Wednesday afternoon and rice in Sunday evening.

I am eating dinner with my friends (ugali with beans)

ENVIRONMENT

Apart from curriculum we are having extra curricular activities as a part of studies. We are dealing with maintenance of environments and keep the collage clean

**THE FRONT
PART OF OUR
ADMINISTRATIO
N BLOCK AND
ASSEMBLING
HALL. THE
ENVIRONMENT
ARE SO
ATTRACTIVE.
DUE TO OUR
EFFORT OF TAKE
CARE**

Also we are making maintenance of infrastructures like painting, foot path and sport grounds

I am digging a hole for maintain a pipe for waste/dirty water. We have special day for environment activities, Monday and Wednesday after lesson and Saturday morning

FRIENDS

Klerruu Teachers college is a place were I found and meet different friends. The friends are of different tribes and of different region of Tanzania with different beliefs and traditions. Also I get special friends from my religion. We share different interests ideas, knowledge and skills. We make different discussion on subjects, education and life in general.

I involve in different activities of religion as a member and a leader.

Here I am exchanging a leadership after my period be over

BLOCK TEACHING PRACTICE

On April 2007 we were having a teaching practice for one month. I was posted to Mwembetogwa secondary school. It is located ad Iringa municipal was teaching geography form three with three stream of about 50 to 65 student per stream. Student enjoy the subject and the teacher. I also enjoy my teaching and learn a lot. I learn how to solve student problem

Again on October 22nd 2007,we were having the second teaching practice. I was posted to Nyerere High School located at Iringa rural at Mtera dam near Dodoma region.I was teaching geography. I was assigned to different school activities such as teacher on duty, I enjoy my teaching practice and I learn so many different things.

On February 2008 if God wishes I expect to finish my Diploma in education course, Where I will be a teacher for Tanzanian school. This will be another special time to start a new life which will be a independent life.

FUTURE EXPECTATION

I know that only education will enabling me to succeed in life, This diploma course help to pen my eyes to focus forward on education. it is my desire to proceed with the next level of education which is the first degree. I would like to study bachelor of education(science).

It is also difficult if since it costs a lot of money. there is two alternative to study a first degree. The first is to join the collage a s a main campus student and you mast have loan from the Loan board and pay 40% of the fee.

The fee is about 1200\$ to 2500\$ per year. The course takes three years to four.

The second alternative is open university/studies where by you study outside the collage the fees is about 350\$ to 500\$ per year which takes three to four years. But it depends on the location of a person. you must be in the place which will enable the availability of materials and attending to seminars an tests.

SPECIAL REQUEST

I hope now know mw well as you have read my life history, especially my efforts and my desire to study. I kindly request an individual person, A Mother, A father, A Son, a daughter, a family or a group of friend, an institution or a company to enabling my studies for first degree course.

Special thanks

I kindly thanks Mr Linus Dunkers, Mr&Mrs Dunkers, Mrs Berit Nordmak, Maria and other friends from Sweden for their great support toward my advanced level secondary education and Diploma in education. May God bless them. I also t hanks for their visit to my family and see themselves the real situation. I special thanks Mr Linus my Computer teacher who stayed with me for enough period of time and testify himself on my behavior and my cord of conduct.
